## **AYUDA, LLC Launches Virtual University**

*AYUDA LLC Launches Online Training Services for Pipeline and Construction Industries*

**(OKLAHOMA CITY, April 1, 2011)** – Established in January 2008, [AYUDA Assessment, Training, Consulting & OQ, LLC](#) announced today the launch of their new online courses, designed in collaboration with [360Training.com](#). With a staff of highly qualified construction and pipeline industry professionals and NCCER-certified members, AYUDA’s new service will offer training courses to help construction and oil and gas professionals meet their training needs.

“Training and certifying new staff members takes a great deal of time, energy and resources,” said Melinda Traynor, principal and owner, AYUDA LLC. “Our clients’ crews are often working in several locations all over the US and abroad. If companies have employees that must meet an OSHA Safety regulatory requirement, or a Client Safety Requirement, and they cannot come back to home base for training, the AYUDA Virtual University offers them some flexibility in meeting those requirements.”

AYUDA’s expansion into online training is just one of many areas of the company’s growth. AYUDA has helped Pemex, Mexico’s sole petroleum company, design and implement their safety training program. And in 2011, AYUDA launched a blog to explore various topics relevant to the construction, and oil and gas industries.
